PREMIUM MODELLING CLAY

110 → 130°C
230 → 265°F

± 10 min
30 min

- Polymer clay which hardens in the oven
- Odourless, even when baking
- Does not stain hands nor working materials
- Very flexible and easy to work
- Ideal for delicate work
- Retains always the form
- All colours can be mixed together
- Very hard after baking: can be drilled, sanded, painted,...
- Suitable for all techniques
- To this we recommend: Cernit Accessories - Cernit varnish in glossy and matt - Cernit Finish Glass epoxy resin glossy - Cernit Sparkling - Cernit Magic Mix - Cernit Glue

105 colours
in packs of 56 g

15 colours
in packs of 250 g

17 colours
in packs of 500 g

*** = Colour number

NUMBER ONE - standard opaque colours 56g

56g CE 090 0056 *** / 250g CE 090 0250 *** / 500g CE 090 0500 ***

OPALINE - colours with porcelain finish 56g

56g CE 088 0056 *** / 250g CE 088 0250 *** / 500g CE 088 0500 ***

The Cernit Opaline colours will have a depth effect after they have been baked. As they become slightly translucent, the pigment will give its real intensity, the colours will thus be slightly darker after baking.

TRANSLUCENT - translucent colours 56g

56g CE 092 0056 *** / 250g CE 092 0250 *** / 500g CE 092 0500 ***
